

OhioHealth COVID-19 EMS Patient Test Results Notifications

If a patient transported by EMS is tested for COVID-19 and has a positive test result, the local health district will notify EMS and others identified as having contact with the patient.

If notified of a COVID-19 positive test result for a patient transported by EMS and the transporting EMS agency can be identified, the OhioHealth EMS Outcomes team will also notify the EMS agency's Infection Control Officer.

Important! EMS should provide a copy of the EMS medical record (i.e. run sheet) as soon as possible following each patient hand-off. Without the EMS medical record, we may have difficulty identifying and notifying an affected EMS agency.

For questions about EMS patient testing or results, the EMS Infection Control Officer, EMS Coordinator, or a chief officer should contact the OhioHealth EMS Outcomes team via email: emsoutcomes@ohiohealth.com
